1. Introduction

This document has been prepared as help for Sitmun3 users.

1.1. Document content

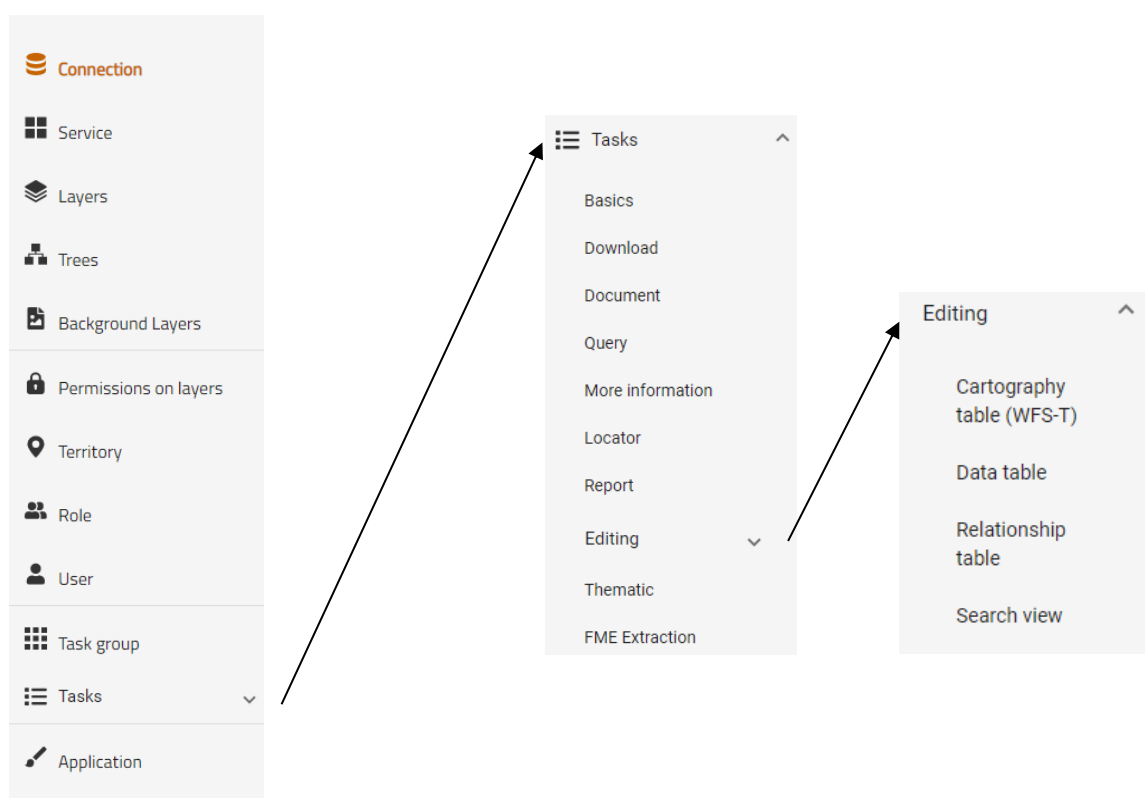

This document gives a short description of how the application works and introduce the application to the users that have access to Sitmun3.

2. Application description

2.1. Generic components

This section describes the generic components that can be found throughout the application.

2.1.1. Application Menu

The menu is common to the entire application and is located on the left side of the screen. It is formed by the section name and its icon. When we select one of the sections it will take you to the corresponding screen.

Clicking on the "Tasks" drop-down will open the drop-down with all available task screens (right image).

The selection we are currently in will be its name marked orange.

2.1.2. Data Tables

<input type="checkbox"/>		Id	Name	Driver	Connection
<input type="checkbox"/>		2	Name of Connection 2	driver.jdbc.DatabaseDriver2	jdbc:database:@host:schema2
<input type="checkbox"/>		3	Name of Connection 3	driver.jdbc.DatabaseDriver3	jdbc:database:@host:schema3
<input type="checkbox"/>		4	Name of Connection 4	driver.jdbc.DatabaseDriver4	jdbc:database:@host:schema4
<input type="checkbox"/>		5	Name of Connection 5	driver.jdbc.DatabaseDriver5	jdbc:database:@host:schema5
<input type="checkbox"/>		6	Name of Connection 6	driver.jdbc.DatabaseDriver6	jdbc:database:@host:schema6
<input type="checkbox"/>		20	Name of Connection 20	driver.jdbc.DatabaseDriver20	jdbc:database:@host:schema20
<input type="checkbox"/>		21	Name of Connection 21	driver.jdbc.DatabaseDriver21	jdbc:database:@host:schema21
<input type="checkbox"/>		26	Name of Connection 26	driver.jdbc.DatabaseDriver26	jdbc:database:@host:schema26
<input type="checkbox"/>		27	Name of Connection 27	driver.jdbc.DatabaseDriver27	jdbc:database:@host:schema27
<input type="checkbox"/>		28	Name of Connection 28	driver.jdbc.DatabaseDriver28	jdbc:database:@host:schema28
<input type="checkbox"/>		29	Name of Connection 29	driver.jdbc.DatabaseDriver29	jdbc:database:@host:schema29

To show data from different sections we will have a table like this.

2.1.2.1. Edited fields

Clicking on a field will allow you to edit the cell value (if the field clicked can be modified), once the new value is written, pressing the intro key will change the value in the table and highlight the modified green cell.

<input type="checkbox"/>		Id	Name	Driver	Connection
<input type="checkbox"/>		2	MODIFIED VALUE	driver.jdbc.DatabaseDriver2	jdbc:database:@host:schema2
<input type="checkbox"/>		3	Name of Connection 3	driver.jdbc.DatabaseDriver3	jdbc:database:@host:schema3
<input type="checkbox"/>		4	Name of Connection 4	driver.jdbc.DatabaseDriver4	jdbc:database:@host:schema4
<input type="checkbox"/>		5	Name of Connection 5	driver.jdbc.DatabaseDriver5	jdbc:database:@host:schema5
<input type="checkbox"/>		6	Name of Connection 6	driver.jdbc.DatabaseDriver6	jdbc:database:@host:schema6
<input type="checkbox"/>		20	Name of Connection 20	driver.jdbc.DatabaseDriver20	jdbc:database:@host:schema20
<input type="checkbox"/>		21	Name of Connection 21	driver.jdbc.DatabaseDriver21	jdbc:database:@host:schema21
<input type="checkbox"/>		26	Name of Connection 26	driver.jdbc.DatabaseDriver26	jdbc:database:@host:schema26
<input type="checkbox"/>		27	Name of Connection 27	driver.jdbc.DatabaseDriver27	jdbc:database:@host:schema27
<input type="checkbox"/>		28	Name of Connection 28	driver.jdbc.DatabaseDriver28	jdbc:database:@host:schema28
<input type="checkbox"/>		29	Name of Connection 29	driver.jdbc.DatabaseDriver29	jdbc:database:@host:schema29

(IMPORTANT: Modifying a value does not mean that it has already been saved, we will see how to do it in other sections)

2.1.2.2. Filters

2.1.2.2.1. Column Filter

Id	Name	Driver	Connection
<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>

Below each column we see a text field that will allow us to filter by the values of that column.

✕ ↶ ↷ ✓

Search
Delete Actions ▾ New

<input type="checkbox"/>	Id	Name ▾	Driver	Connection
<input type="checkbox"/>	<input type="text"/>	MO	<input type="text"/>	<input type="text"/>
<input type="checkbox"/>	2	MODIFIED VALUE	driver.jdbc.DatabaseDriver2	jdbc:database:@host:schema2

To the right of the text field we will see a button that allow us to select how the filter is been applied

Contains ▾

Contains
Not Contains

Different
Start with
End with

2.1.2.2.2. Column Sorting

Id

Id ↑

Id ↓

Clicking on the column name will allow us to order the table ascending or descending by that column.

Id 1 ↑

Name 2 ↑

If one table is sorted by more than one column, a number will appear next to the label showing the sort order

2.1.2.2.3. General Filter

Search

This text field will allow you to filter by a value over all columns.

2.1.2.3. Buttons

2.1.2.3.1. Edit buttons

The edit buttons will be displayed at the top-left of the table, if we have not edited any field, it will be disabled (left image), otherwise they will be enabled (the undo and redo buttons may not be the two activated according to the edits)

Discard changes button: Pressing that button will discard all edit changes.

Undo button: Pressing that button will undo the last change.

Redo button: Pressing that button will redo the last undo action (only available if you have pressed the undo button before).

Save changes button: This button will save all the changes we have made on the table. (**IMPORTANT:** That button will only be available in external tables, in form's tables it won't be available)

2.1.2.3.2. Action buttons

The action buttons will be displayed at the top-right of the table.

The delete button will delete the selected rows. If we are in a generic table, the element will be deleted immediately. If we are in a form table, it will be marked as pending delete and will be deleted later. (We will deepen in other sections). The delete button will only be available if we have any column selected by the checkbox of the first column.

The new button only will be available on a generic tables (where it will redirect us to a form to create a new element) and in a few form tables (where it will open a dialog to create the new element).

The add button only will be available on the tables that there isn't the new button. This button will open a dialog to select a new elements of the same type as the table entity to introduce it on the table

Export button will start a download of a csv file where there will be the columns of the table and the selected rows.

Example:

	A	B	C	D	E	F	G
1	Id,Name,Driver,Connection						
2	2,"MODIFIED VALUE","driver.jdbc.DatabaseDriver2","jdbc:database:@host:schema2"						

Duplicate button will duplicate the selected rows, introducing the new elements to the table (on generic tables will be created immediately). This button only will be available on a generic tables and in a few form tables.

Rows to show button will only be available on form tables, allow the user to modify the number of values displayed in the table.

2.1.3. Forms

2.1.3.1. Buttons

The form buttons will be displayed on the top-right of the screen.

The return button will redirect us to the generic table of the element type that we are editing.

The save button will save create or save all the changes of the element, form changes will be saved first, and if it goes correctly, it will save all the changed made on the element tables.

2.1.3.2. Fields

General Data

Name *	Description	Active
<input type="text" value="Mapa topogràfic"/>	<input type="text" value="Topogràfic"/>	<input type="checkbox"/>

Every form will have their own fields to edit/create the element.

- * If a field has a red star at the end of its name, it will indicate that you must fill that field before send the form.

2.1.3.2.1. Translation fields

Name *

Mòdul consulta municipal

The blue flag at the end of the entrance means that that field is translatable, if you click on it a dialog will be shown

Valor

Valor

Valor

Valeur

Cancel

Accept

This dialog allows the user to define a translation for the selected field in 5 different languages (Catalan-Spanish-English-French-Aranese), the language the user is using will not appear, as it will take as value the one entered in the form field.

If a field already has a translation for any language, it will be shown when the dialog opens.

Important: Accept button does not save the translations, they will be saved when the user clicks on the save button

2.1.3.2.2. Password fields

Form fields referring to passwords will not display previously saved passwords, if the checkbox 'password set' is checked it will mean that this entity already has a saved password, and if we fill in the form these fields we will overlay the stored password.

Password <input type="password"/>	Confirm Password <input type="password"/>	Password set <input checked="" type="checkbox"/>
--------------------------------------	--	---

2.1.3.3. Internal tables

Forms can have their own internal tables that will allow the user to manage relations of the edited/new element.

Add

<input type="checkbox"/>	Id	Name	Status
<input type="checkbox"/>	147	Name of Role 147	Without changes

Pressing on the drop-down button, will allow the user to hide the table, but all the tables will be opened by default.

Cartography Configuration

Roles

2.1.3.4 Status column

Status

Without changes

Pendent modify

Pending delete

Pendent creation

Almost all internal tables will have a status column, that will show the user the status of the row.

- Without changes This status indicates that the rows has not been changed and it is not a new element. The row is in its original status.
- Pendent modify This row has been edited by the user, but the changes are not saved yet.
- Pending delete This row has been marked by the user to be deleted, but the element is not deleted yet.
- Pending creation This row has been added to the table, but the elements not exist yet.

2.1.3.4. Dialogs

Clicking on the add/new button will open a dialog that allows the user to select the elements that will be added to the table

2.2.2.4. Layers to register internal table

Rows to show: 10 25 50 100 All				Update layers	Delete	Actions	Register
<input type="checkbox"/>	Id	Name	Description	Status			
<input type="checkbox"/>	1250	OGCWMs - ADIF - Dependències		Without changes			
<input type="checkbox"/>	1251	OGCWMs - ADIF - PQ tècnics		Without changes			
<input type="checkbox"/>	1253	OGCWMs - ADIF - Trams en servei		Without changes			
<input type="checkbox"/>	1252	OGCWMs - ADIF - Trams fora de servei		Without changes			

This table relates to the “Update data” button (form), clicking this button will update the form data with the data received from the url field and include the service layers in this table, if you want to add layers without updating the form data, you will have to click on the 'Update add' button on the top-right of the table.

When layers are loaded, if you want to create this layers on the application , you will have to select this layers and click the 'Register' button (changes will be applied when user clicks on form save button).

This table has three status different from other tables:

- **Unregistered layer:** The layer exists on the service and user has not check it to be registered.
- **Pending registration:** The user has marked the layer to be registered when we save the service entity.
- **Not available:** The layers is saved on the application service but not appears on the data retrieved from the url field.

Configuration

These are the fields that the user can modify of a layer.

2.2.4.3. Folders and nodes

A tree is composed of folders and nodes.

This icon will appear if a node is a folder, if is not a folder no icon will be displayed.

The different folders and nodes will be displayed as follows:

2.2.4.3.1. Buttons

This icon will appear if the node is a folder and has children nodes, clicking on it will show them

This icon will open the form to add a folder to the node selected, only will be displayed if the node is a folder.

This icon will open the form to add a node that is not a folder to the node selected, only will be displayed if the node is a folder.

This button will mark the node and its children as deleted; the nodes deleted will be displayed as follows:

(Pending delete)-Subestacions elèctriques (WMS Gencat)

This button will open the corresponding form (depending on the node if is folder or not) to edit the item.

Load from service

Load from service button allows user to load all layers from a WMS service into the tree.

2.2.4.3.2. Folder form
